

Alibaba Cloud brought to you by BCX

Reimagine success and double
capacity with end-to-end
cloud solutions

 Alibaba Cloud

BCX

Cloud computing is a critical driver of digital transformation as it allows businesses to rapidly secure the computing services they need without having to develop and deploy them themselves.

As a systems integrator, our role in the cloud ecosystem is to bring our own blend of skills and expertise to our clients on the best cloud solution for their business. This is why we partner with a variety of vendors and service providers to ensure we can provide the technology that best fits our clients' needs.

As the exclusive Alibaba Cloud distributor for South Africa and preferred partner for the rest of Africa, we are perfectly positioned to scale your cloud capabilities and offer you expert skills that drive business growth. With over 200 solutions, you're able to consume a module at a time using your normal trade environment at a flexible pricing structure and attractive SLAs.

ALIBABA CLOUD PRODUCT PORTFOLIO					
CORE INTERNET TECHNOLOGY	Middleware	Video and traffic	IoT	Application service	Security
	MQ – Rocket MQ	Video on demand	IoT wireless connect	Domains	Security management (Managed security service)
	MQ – MQTT	Apsara live video	IoT platform	Alibaba mail	Application security (WAF/CA/content moderation/website threat inspector)
	Application real-time monitor	Media transcode service	IoV command centre	Web hosting	Data security (KMS/SSL certificate)
	EDAS	CDN		API gateway	
	Web +	Short message service			
DATA INTELLIGENCE	Database			Big data and AI	
	RDS for MySQL	Redis	POLAR DB for MySQL	DataWorks	MaxCompute/PAI
	RDS for SQL server	Mongo DB	POLAR DB for Postgre	E-Map Reduce	Telsa/DataHub
	RDS for PostgreSQL	Data transfer service	Analytic DB for MySQL	Data V	Quick BI
	RDS for PPAS	Data management service	Analytic DB for Postgre	Elastic Search	Open Search
	RDS for Maria	ADAM	Hi-Time series DB	NLP/ASR	Image Search
CLOUD INFRASTRUCTURE	Elastic compute	Innovation compute	Storage	Network	Private cloud
	ECS	E-HPC	Object storage service	Virtual private cloud	Cloud enterprise network
	Auto scaling	Bare metal instance	Block storage	Express Connect	Smart Access Gateway
	Reserved instance	Function compute	File storage	NAT Gateway	Global Acceleration 2.0
	• Container service for Kubernetes • Elastic container instance • Container registry	GPU instance FPGA instance Super compute cloud	Cloud storage gateway Hybrid backup recovery Table store	Server Load Balance VPN Gateway	Shared Traffic Package Shared Bandwidth
				Apsara Stack Enterprise Apsara Stack Agility Apsara Stack Agility with Zstack Data Centre as a Service VPN Gateway	

INDUSTRY SOLUTION

Financial services

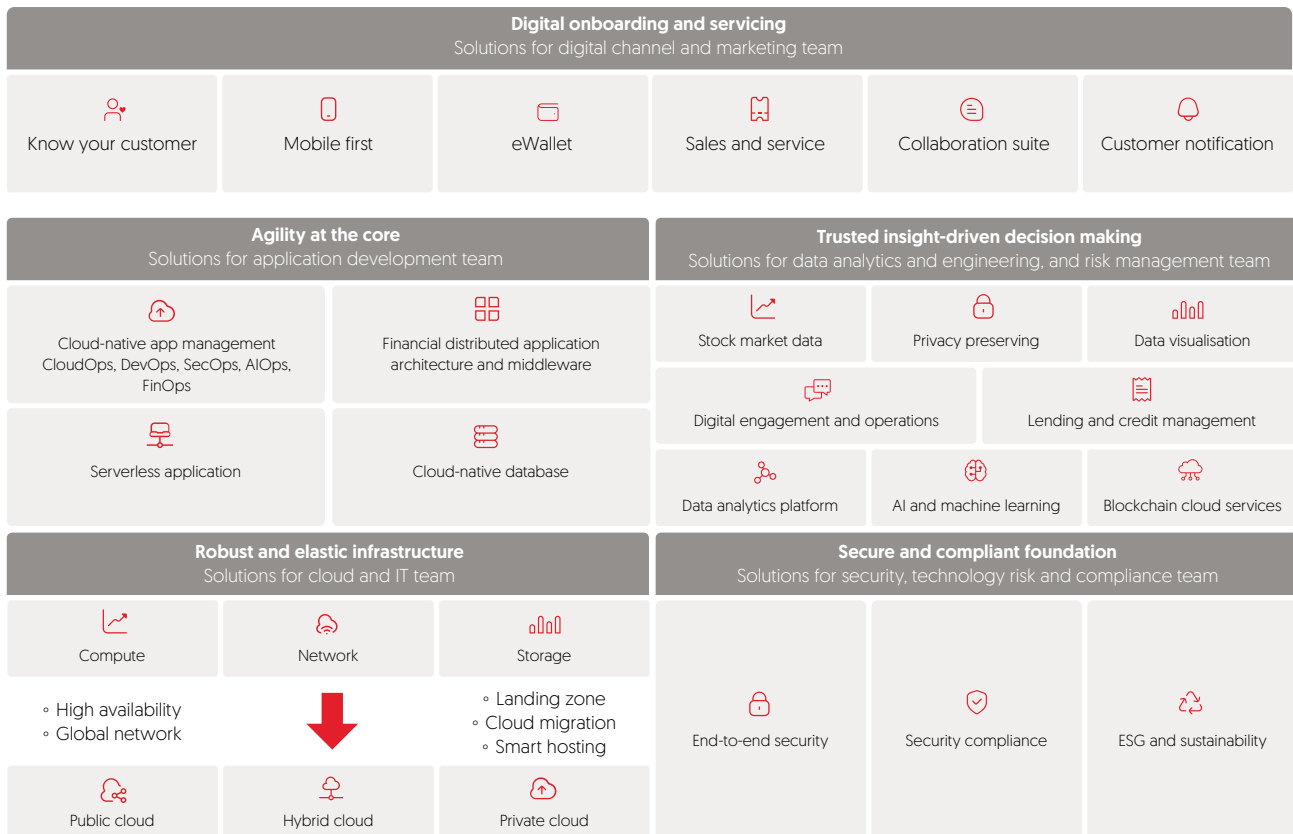

Alibaba Cloud offers a complete set of cloud services to customers worldwide, including elastic computing, database, storage, network virtualisation services, large-scale computing, security, management and application services, data analytics, a machine learning platform, and IoT services. Utilising these capabilities, alongside extensive financial industry experience, we have built a comprehensive suite of cloud-native financial products and solutions that are road tested within the Alibaba Financial Services business before they are made available to the public.

Financial Services Industry solutions foundation

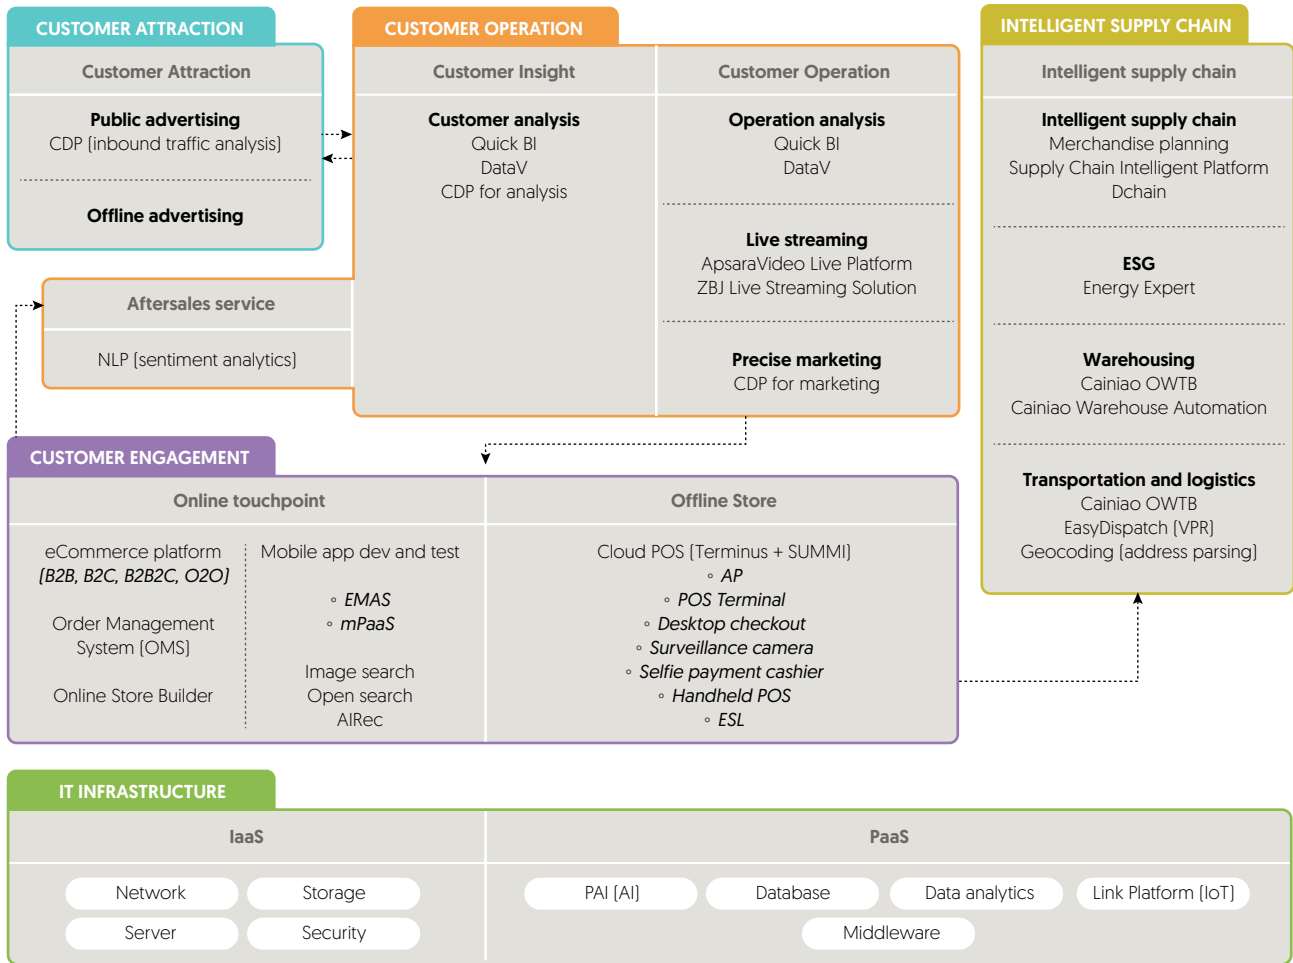

Financial solutions roadmap

Alibaba Cloud introduces financial digital-native solutions, solving industry challenges while keeping up with trends.

Retail

Alibaba Cloud provides proven pioneering of technology in the retail industry. The cloud and intelligence help retailers, and any consumer-focused business, transform for the digital age.

In addition to our industry-specific solutions, our cloud platforms accelerate digital transformation with public cloud and private cloud solutions.

Public cloud

As a key enabler for innovation, our public cloud offering creates new ways to drive revenue and gain efficiencies. BCX acts as a multi-cloud aggregator, offering services from multiple hyperscalers and manages the complexity of the offerings to ensure our clients get the deployment they need without the complications.

Private cloud

Harness a best-of-breed private cloud service that works with you as your business grows. Private cloud solutions give you ownership and oversight of your data protection, governance and compliance with our secure on-premises cloud environments. Our cloud experts will help you design and implement your private cloud environment in line with business needs.
