

# Superior connection to create new **business** **opportunities**

Great innovations thrive  
in difficult times

**BCX**

## **WHAT IS FTTB?**

Fibre to the Business / Home Office [or FTTX] is a new generation data communication technology that enables faster data transmission over fibre lines replacing traditional copper lines.

## **WHY CHOOSE BCX'S FTTB?**

BCX brings new, improved fibre bundle prices, which offers more price-competitive bundles by reducing the current bundle prices. This will assist in enabling new fixed broadband customers to enjoy more affordable connectivity solutions.

The proposed price reductions support the nation's ability to access data services more cost-effectively if they reside within the FTTX footprint.

The proposed price reductions will empower businesses and their employees to work from home, create new business opportunities via online services and support their families for home schooling.

## PRODUCT OPTIONS

The following table shows the bundle and standalone offerings.

**Table 1: Unlimited Fibre Business Lite**

Unlimited Business Fibre Lite	Price (Exclude VAT)	Price (Including VAT)
25Mbps FTTX + 10Mbps Uncapped (Lite)	R434	R499
