

Reimagine smart software testing with Smar-Test

Smar-Test – BCX’s fast, cost-effective Testing-as-a-Service platform – has been designed to overcome the challenges you face testing websites and applications before go-live.

Smar-Test harnesses the power of AI and data analytics to deliver comprehensive insights into an application’s strength and reliability. It delivers a single, customised report and outlines a practical path for enhancements and improvements.

Smar-Test provides a unified, automated Testing-as-a-Service platform.

It covers functional and non-functional testing and evaluation of applications across all critical dimensions.

Automation and accelerators deliver faster, better test coverage.

This means reduced frustration rates and lower bounce rates.

Boost customer reach, satisfaction, engagement, loyalty, conversions, your brand reputation and, ultimately, revenue.

Unlock potential. Boost your site or application’s capabilities for ultimate performance.

Smar-Test’s services:

Functionality testing	Essential features and capabilities testing	Mobile responsiveness testing
Performance testing	Security assessments	Cross-browser compatibility checks
Usability assessments	Link validation	And more

Take advantage of multiple testing plans

Entry, Basic, Custom, End-to-end and Enterprise – each designed to suit your needs.

Benefit from:

Up to 50% lower testing costs due to improved test efficiency, productivity and best practices

75% improvement in test coverage and effectiveness

Up to 60% less testing effort

Up to 50% improvement in application quality, stability, availability and performance

Up to 30% improvement in test cycles

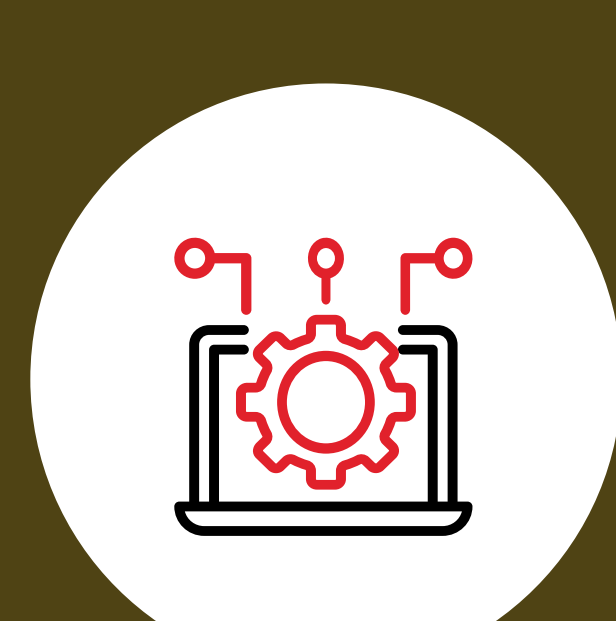

Smar-Test reporting:

Implement improvements and enhancements immediately with detailed, customised reporting.

Defects are prioritised and solutionised, with detailed recommendations and conclusions to resolve bugs and issues.

Reports include historical application and quality-assurance KPIs, data tracking and trend analysis for overall application-quality evaluation.

View, download and email reports from within Smar-Test.
